DETAILED ACTION

Status of Claims

1. This action is in reply to the amendment filed on 16th of December 2009.
2. Claims 61, 88, 106, 108, 113, 120, and 122 are amended.
3. Claims 61-86, 88-120, and 122-124 are allowable.
4. Claims 87 and 126 are cancelled.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The instant application is directed towards evaluating the company using statistical data generated. More specifically, the applicants' claims method for trading information related to commercial companies via a network, comprising the steps of: collecting private company information from a first user location through a user interface on a computer system at the first location, the private company information having a confidential data portion, which includes confidential identifying information for a private company that corresponds with the private company information; generating exchange data from the private company information at the first user location, which is characterized by an absence of confidential identifying information for the private company, wherein the act of generating the exchange data includes acts of: associating classifications to the private company information based on the confidential identifying information; receiving only the exchange data at a central computer system at a central location via a computer network; defining an exchange data set at the central location on the central computer system, wherein the defined exchange data set comprises information on assets and liabilities of the private company; updating, by a processor, the exchange data set using the exchange data; generating private company statistical data based upon the updated exchange data and at least one statistical model, wherein the private company statistical data includes statistical averages, the statistical averages including at least one of average deal statistics, average valuation statistics, average collateral statistics, average operating performance statistics, and average operating performance data; determining, by the processor, an output data set from the

Art Unit: 3691

exchange data set; transmitting the output data set from the central location to a user at the first location via the computer network; wherein the private company is part of a commercial industry, and the output data set includes statistical averages for the commercial industry; wherein the output data set comprises statistical information for obtaining a valuation of the private company, the valuation of the private company including at least an estimated market value of the private company, wherein the estimated market value incorporates evaluation of liabilities and assets of the private company; and valuing the private company based on the output data set. Furthermore, Fitzgerald [US 6,434,533 B1] is directed to determining pricing information for time dependent inventories (e.g. hotel rooms, rental cars, plane tickets), Doctor [US 6,330,610 B1] discloses a multi-stage data filtering system, Hi-Tech Writer's (NPL#1) discloses the e-business evaluation system, and PR Newswire (NPL #2) discloses performance evaluation software.

However, in the instant application none of prior arts of record either individually or in combination teach or suggest valuating the company's assets and liabilities using the generated "*private company statistical data based upon the updated exchange data and at least one statistical model, wherein the private company statistical data includes statistical averages, the statistical averages including at least one of average deal statistics, average valuation statistics, average collateral statistics, average operating performance statistics, and average operating performance data.*"

For these reasons claims 61, 88, 106, 113, and 120 are deemed to be allowable over the prior art of record, and claims 62-86, 89-105, 107-112, 114-119, and 122-124 are allowed by dependency on an allowed claim.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
